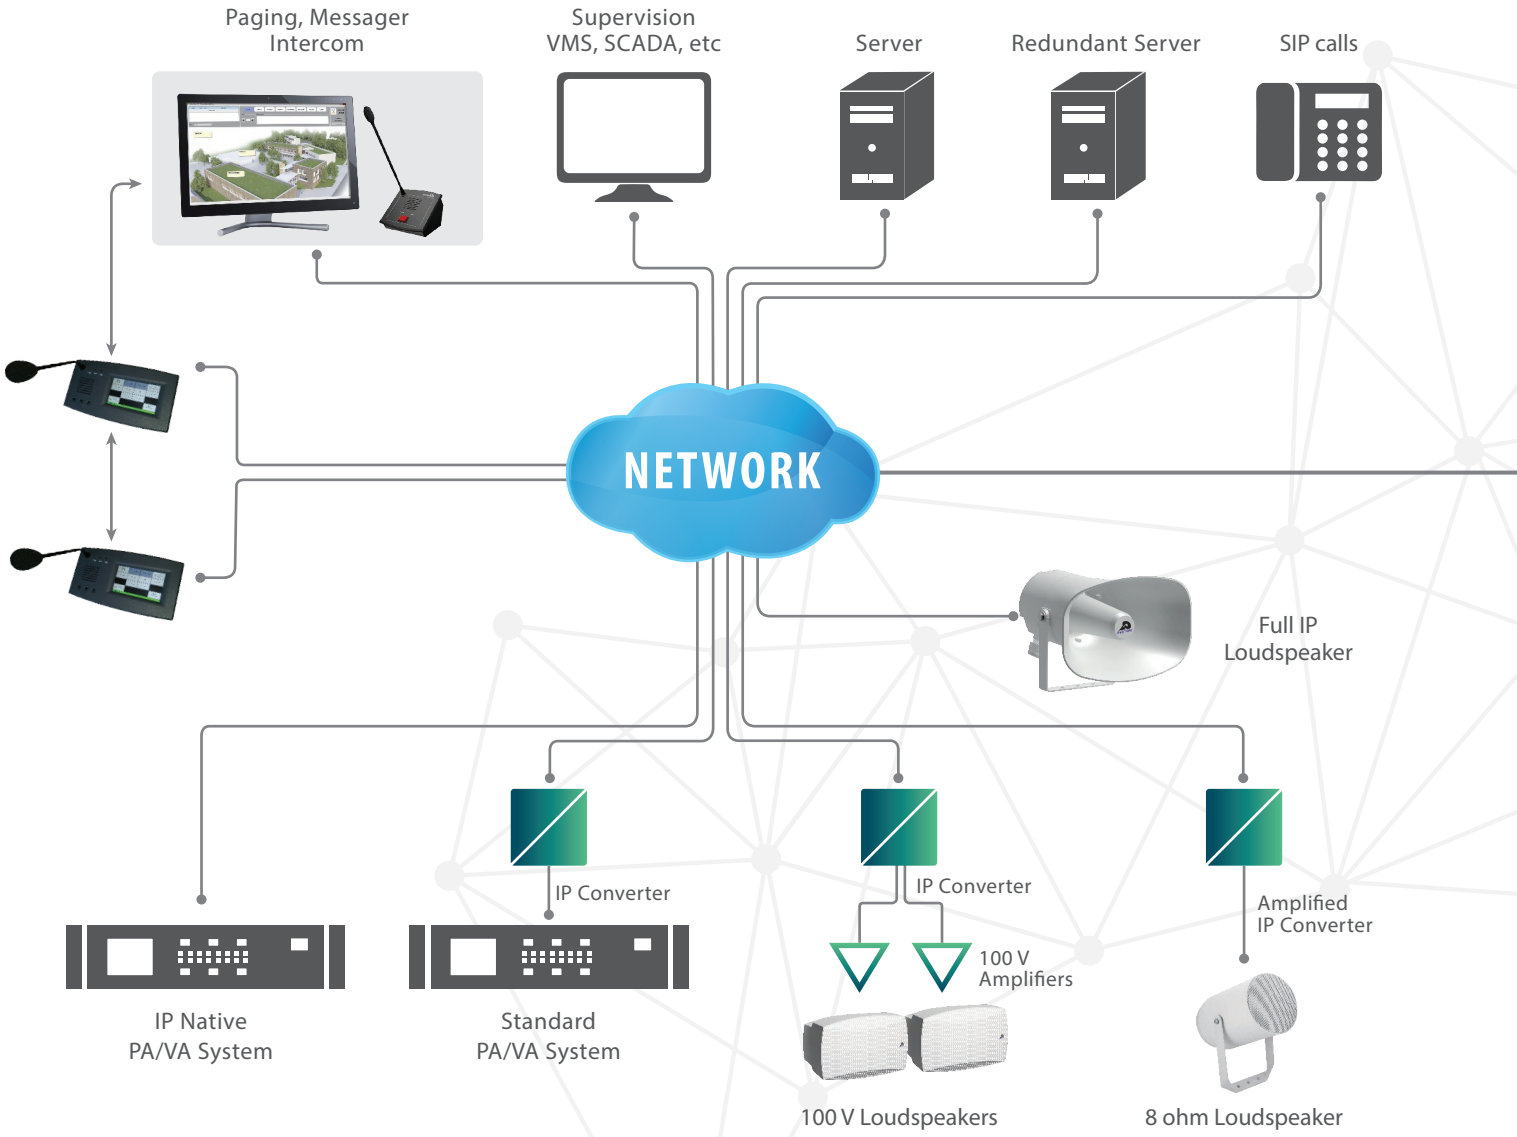
Vox@net

AUDIO MANAGEMENT SOFTWARE

www.ateis-europe.com

AUDIO MANAGEMENT SOFTWARE

- Supports the majority of IP audio protocols and formats
- Programming of messages, music, audio levels, and scenario management
- Supervision of all system elements
- Support for current telephony standards
- Bandwidth optimization on the used network
- Customization of access and interface by user
- Archiving of operation details for easy storage and management
- Plug-in based architecture for specific features and interfacing
- Intercom between users
- Manages all types of PA/VA system



Vox@net (AMS) manages and controls your audio system over an IP network. No matter the size or location of the sites to be equipped, Vox@net will provide you a full control of your audio system in a simple way.

KEY ADVANTAGES OF THE SERVER

- Windows Service with redundancy and/or replication option
- Organization and management of messages accessible by clients
- Busy states, priorities and queue management
- Supervision interface through standard protocols
- Centralization of all files (messages, configurations, history, ...)

KEY ADVANTAGES OF THE CLIENT SOFTWARE

- Possible support for more than 500 clients
- Graphical interface and accesses customizable by user
- Visualization of all equipments and their status for maintenance purposes
- Message recording and Text-to-Speech

High Audio Quality

Scheduler
